

WAVE Mould

Challenge	<ul style="list-style-type: none">• Improve billet shape and internal quality
Solution	<ul style="list-style-type: none">• Special internal “WAVE” geometry (KME patent pending)
Application	<ul style="list-style-type: none">• Billet and bloom moulds in all copper alloys• All types of hot face coatings• Compatible with existing equipment
Advantage	<ul style="list-style-type: none">• Improved product quality due to better strand guidance in the mould• Reduced billet rhomboidity• More uniform shell growth• Increased casting speed• Improved mould lifetime
